

BIG NEWS!

2025 Nuclear Science Week™

National Host City Event celebration and observance has been awarded to the American Museum of Science and Energy Foundation, Inc. (AMSEF), in Oak Ridge, TN.

Jennifer Hayden President and CEO of the National Museum of Nuclear Science and History announced to her board, "It is my great pleasure to inform you that the 2025 Nuclear Science Week National Host City Event celebration and observance has been awarded to the American Museum of Science and Energy Foundation, Inc. (AMSEF), in Oak Ridge, TN.

Congratulations to Alan Lowe, Matt Mullins, and their AMSEF team who will present events and activities this coming October in Oak Ridge for Nuclear Science Week 2025!"

Jennifer, the honor is ours, thank you. We are excited to share this week of events with our community, the region and the nation!

.....

Nuclear Science Week (NSW) is an international, week-long celebration of nuclear science. Hosting this unique event in Oak Ridge will highlight the eighty years of nuclear technological advancement since the Manhattan Project began the Atomic Age.

Taking place October 20-24, NSW 2025 will bring together civic, private and corporate partners for a week of educational opportunities, workforce and professional development sessions, tours of historic and modern sites at Department of Energy facilities and a number of community activities culminating in an all-ages, family-friendly exposition highlighting the latest developments in nuclear technology at the American Museum of Science and Energy.
