

**Larry B. Cutlip**  
*Vice President, Field Operations*

Larry B. Cutlip is Vice President, Field Operations for Centrus Energy Corp. He leads the company's activities at the Oak Ridge TN, Piketon OH and Paducah KY sites and is charged with transforming field operations from a unilateral focus on the American Centrifuge to a multi-functional organization strategically focused on securing Centrus' position in the nuclear industry.

Mr. Cutlip has more than 35 years of nuclear industry experience including senior roles in plant operations, manufacturing, technology development and project management.

Mr. Cutlip has a strong history of leading successful programs for the company including establishing the manufacturing base for the American Centrifuge Program, successfully completing the Cold Standby, GCEP Cleanup and Technetium Cleanup programs at the Piketon site and establishing transfer and shipping capabilities at the Paducah Gaseous Diffusion Plant. He has received numerous corporate awards for these efforts.

Most recently, Mr. Cutlip, lead the technology development, manufacturing and testing activities at the Oak Ridge site and served as the deputy to the VP, American Centrifuge.

Mr. Cutlip holds a Bachelor of Science degree in physics and mathematics from Muskingum College. He completed Advanced Management Training School as well as numerous other technical and management training programs.

Centrus Energy Corp. is a trusted supplier of enriched uranium fuel for commercial nuclear power plants in the United States and around the world. Centrus is advancing the next generation of centrifuge technologies so that America can restore its domestic uranium enrichment capacity. Our mission is to provide reliable and competitive fuel goods and services to meet the needs of our customers, consistent with the highest levels of integrity, safety, and security.
