Industry and CANM

- Apply Lessons Learned from Industry
 - Mature design prior to contract initiation
 - Reduce the number of changes
 - Configuration management and change control
 - Improve the rigor in the development, implementation and assessment of qualification testing to establish or ensure adequate component design
 - As design authority, need to understand manufacturing means and methods.

Industry and CANM

- Value of CANM
 - Industry focused development cell for reactor designers (a roof to work under)
 - Maintain control of IP
 - Industry focused AdMfg projects with path to commercialization
 - Technology Development
 - Code development
 - Industry consensus standards
 - Regulator support
