

Scott Bailey
Vice President of Supply Chain
NuScale Power

Scott Bailey, vice president of Supply Chain, leads all aspects of NuScale Power's supply chain function including internal procurement operations and strategic supply chain development.

Bailey has over 30 years of power generation focused supply chain management and execution experience from supplier, utility, and consultant perspectives.

Prior to joining NuScale, Bailey was the director of supply chain, nuclear generation, development and construction for the Tennessee Valley Authority. In that capacity, he managed contracting and supply chain related activities in support of major nuclear generation projects such as the Watts Bar Unit 2 completion, Bellefonte Unit 1 completion, steam generator replacements, spent fuel pool re-racking, extended power uprates, and other major nuclear projects. Bailey previously held senior supply chain management and consulting positions for NRG Energy, Sequoia Consulting Group, Pantellos and Maine Yankee Atomic Power Company. Bailey is an accomplished and experienced supply chain executive in all of the key areas of supply chain including supplier relationship development, EPC Contract development and administration, value creation, strategic sourcing, contract management, procurement and materials management operations, eCommerce and project management.

Bailey holds a master's degree in business from Husson University, a bachelor's degree in marine engineering from Maine Maritime Academy and is a certified manager of Investment Recovery.
